

RANGE 3A

RANGE DESCRIPTION

Range 3A is an active, small arms, live-fire range located at Grid 85646486. It is accessible from MCB-3. **Max range is 445m.**

Primary Use: Individual small arms familiarization, grenade launcher firing, and automatic weapons qualification.

Alternate Use: None.

High Explosive ammunition is fired on Range 3A, designating it as a sensitive-fused, duded impact area.

This range is divided into four smaller sub-ranges called bays. They are numbered one through four, left to right.

DOWN RANGE MOVEMENT INTO THE IMPACT AREA IS PROHIBITED

Bay 1:

Number Firing Points: Three M203 with log walls.

WEAPONS AUTHORIZED:

- 40mm Grenade Launcher, handheld
- M-72 Trainer
- AT-4 Trainer
- SMAW Trainer

AMMUNITION AUTHORIZED:

- Handheld 40mm (All)
- AT4 9mm
- SMAW 9mm
- M72 21mm SubCal

Targets: (2) EODT (min range-170m, max range-340m)

Special Instructions:

1. Only weapons and ammunition listed in this SOP will be used on this range.
2. OIC and RSO must be present while live fire is in progress.
3. This is a sensitive fuse impact area. **DOWN RANGE MOVEMENT INTO THE DUDDED IMPACT AREA IS PROHIBITED ON RANGE 3A.** Only Explosive Ordnance Disposal (EOD) personnel have access.
4. Ensure range flags are posted, ear protection is worn (eye protection for steel), safety brief is given, Range Control contacted and all fires are directed between the left and right lateral limits markers (black and white striped).
5. All brass, trash, targetry and materials will be removed completely at the end of training by the using unit. This includes any materials used to place targets on.
6. All left and right lateral limit markers are black and white striped. Left side markers have stripes running top to bottom, left to right. Right side markers have stripes running top to bottom, right to left. This range has two (2) sets of markers. The set on the left is for Bay 1. The set on the right is for Bay 4.
7. Maneuvers are not authorized on Range 3A.
8. HE ordnance (40mm) will only be fired from Bay 1 (depicted in photos). It will only be fired into the left side impact area depicted by lat limit markers.
9. AT-4, SMAW and LAAW trainers can be fired from anywhere on the firing line.
10. **Limited movement is authorized (Bay 2 & 4 only) upon prior approval of Range Control.** Troops will not go past the dudged impact area signs for any reason.
11. **Bay 2 may only be used for the purpose of weapons BZO with prior approval of Range Control.** This bay utilizes the left and right target stands that will be placed ten meters downrange as the left and right lateral limits. Shooters will not use the left and right lateral limit signs that are downrange in the impact area. Shooters will not fire at the steel targets downrange.
12. Bay 3 is currently inactive until further notice.

13. Entrance or exit to or from Range 3A is prohibited when MCB 3 is closed due to Murphy Demolition Range detonating charges. Unit will follow all special instructions provided by the RCF.

14. Entrance or exit to or from Range 3A is prohibited when MCB 3 is closed due to Murphy Demolition Range detonating charges.

15. 40mm grenades will only be fired from Bay 1. High Explosive (HE) grenades will not be fired when it is snowing, or there is 2 inches or more of snow or water on the ground.

16. The number of weapons that can be fired from the Bay 2 and 4 firing lines will depend on the type of weapon system, its size and the space needed to safely operate it.

17. **Movement is authorized on bay 4 only.** Troops will not go past the duded impact area signs for any reason. Safety supervisors/students will be at a 1 for 1 ratio.

18. Units that do not occupy their range within two hours of their scheduled occupy time will lose the use of that range for that day.

19. Range 5 cannot be occupied when Range 3A is firing 7.62 mm from bay 4.

20. Range 4 cannot be occupied when Range 3A is firing 7.62, 5.56 and 9mm from bay 4.

Bay 1 from tower.

Bay 1 from tower.

Bay 1 bleachers and ammo shed.

Bay 2:

Number Firing Points: Multiple

WEAPONS AUTHORIZED:

- Service Rifle
- Light Machine Gun (SAW)
- Automatic Rifles

AMMUNITION AUTHORIZED:

- 5.56mm (All)

Targets: No targets in the impact area are fired upon from this bay. Non-metallic targets are placed by the training unit for close in shooting for weapons BZO. These targets will be placed on the target line and will not be placed in the impact area. The number of weapons that can be fired from the firing line at once will depend on the type of weapon system, its size and the space needed to safely operate it

APPLICABLE MAP SHEET. All grid coordinates listed in this order apply to the Quantico Military Installation Map V834S Edition 4-NGA 1:25000.

FACILITIES

Towers: 2
Bleachers: 2
Sheds: 1
Ammo Breakdown table: 1
Parking: Yes. Approx 15 - 20 vehicles.

UTILITIES AVAILABLE

Electricity: None
Lights: None
Water System: None

INSTALLED COMMUNICATIONS. None

Nearest MEDEVAC Landing **MILES**

Zones (LZ) 1 86706410 (LZ 7)

Directions: Exit Range 3A, turn right on MCB-3 and go approx 1 mile. LZ 7 will be on the right.

LASERS AUTHORIZED. Approved aiming devices mounted on standard approved service weapons (no Class 3B or 4 except for PEQ15 and PEQ16 with filter on).

COMMUNICATION REQUIREMENTS:

1. A radio check is required immediately upon occupying any portion of the RTA, every 30 minutes in a live fire status and every 3 hours in a non-live fire status.
2. The Range Control Facility (RCF) Fire Desk Net Control call sign is "Range Control". Your call sign is "Range XX" (name of range, training area or facility unit is occupying).
3. The primary RCF Fire Desk Net Control frequencies are: ELMR talk group "RC Safety" (ground) and 323.7 AM UHF (air).
4. The secondary RCF Fire Desk Net Control is telephone, numbers: 703-784-5321 or 5322.
5. OIC/RSO will monitor the RCF primary and secondary Safety Nets at all times. Instant communication is required.
6. Any unit with organic ELMR radios will have their ELMR radios programmed with the "RC Safety" talk group and use those radios as their primary means of communication within the RTA.

7. Units without organic ELMR assets will be issued ELMR radios from RMB upon check-in.
8. Approved Non-ELMR radios are only authorized for internal communication (ground).
9. If the RCF cannot reach a unit within the RTA via primary communication, the unit will be contacted via the secondary means of communication.
10. Upon loss of primary communication the OIC/RSO will initiate a "check fire"/cease training status and will contact the RCF via secondary communication. This communication will be maintained while primary communication is being restored. Units may only resume firing/training once primary communication has been re-established and clearance is granted by the RCF.

INJURY CLASSIFICATIONS:

Injuries are classified into the following categories in order to aid in casualty evacuation from the RTA.

1. ROUTINE. Routine injuries are those injuries that are not threatening to life, limb or eyesight; and conditions or illnesses treatable by medication or procedures available at the base medical facilities.
2. PRIORITY. Priority injuries are those injuries that require immediate medical attention but are not threatening to life, limb, or eyesight if treated promptly.
3. URGENT. Urgent injuries are severe injuries that are threatening to life, limb, or eyesight and require immediate medical attention.
4. MASS CASUALTY. A mass casualty is a series of injuries with multiple priority and urgent medical patients.

MEDICAL EVACUATION (MEDEVAC) PROCEDURES:

1. Injury occurs.
2. Range immediately cease-fires.
3. Medical support evaluates/treats injured personnel.
4. Range radio operator/OIC notifies the RCF of the injury, stating briefly what happened, the extent of the injury and what type of MEDEVAC transportation needed (ground/air).
5. Maintain constant radio contact with Range Control and await further instructions.

*Minor injuries and illnesses requiring routine field medical services need not be reported to RMB but should be reported in unit training logs.
