

Sports & Recreation

Program Summary:

Injuries incurred via sports and recreational activities, both on and off duty, continue to account for the second largest source of fatalities, hospitalizations, lost-time injuries and injuries leading to limited assignments in the Marine Corp.

In an effort to reduce both the severity and frequency of mishaps from recreational and sporting events, safety awareness and mishap prevention must be actively and continually stressed to all participants.

Training Requirements:

Periodic Safety Training is required at all MCCS activities for the MCCS staff.
