

Environmental Policy Statement

Marines, Sailors, Federal, state and local agencies, and civilians develop and hone their training and technologies aboard Marine Corps Base Quantico to provide key support for the warfighter and our nation. MCB Quantico is committed to proactively improving our performance through an effective and efficient Environmental Management System, while sustaining resources essential to our combat training and readiness.

All individuals who work, train, and live aboard the Base will conduct their actions in an environmentally sound method, and we are all committed to:

- Comply with all laws, regulations, and policies to sustain the ability to train and support the Marine Corps.
- Promote sustainability through an aggressive qualified recycling program and energy and water conservation.
- Educate our Marines, Sailors, Civilian Marines, Base residents, and tenants about their responsibility to protect the environment, prevent pollution, and reduce the use of hazardous materials.
- Conserve our cultural and natural resources.
- Continue our excellent partnership with the local community and regulatory agencies to foster a proactive environmental program.

Operational readiness and lethality are our hallmarks; environmental compliance, pollution prevention, and conservation are the keys to sustaining training essential to these hallmarks. Know and protect the environment; preserve the landscape; and remain ready to fight and win in every clime and place.
