MARINE CORPS INSTALLATIONS NATIONAL CAPITAL REGION-MARINE CORPS
BASE QUANTICO ORDER 3565

From: Commander, Marine Corps Installations National Capital Region-Marine Corps Base Quantico
To: Distribution List
Subj: HAZARDS OF ELECTROMAGNETIC RADIATION TO ORDNANCE (HERO) EMISSION CONTROL (EMCON)
Ref: (a) Hazards of Electromagnetic Radiation to Ordnance Assessment of Marine Corps Base and Marine Corps Air Facility Quantico, Virginia, 24 April 2017
(b) Electromagnetic Radiation Hazards (Hazards to Ordnance), NAVSEA OP 3565/ NAVAIR 16-1-529, Volume 2, Nineteenth Revision, 1 July 2016
(c) NAVFAC 11010/31 Parts I and II, Subj: Request for Project Site Approval/Explosive Safety Certification
Encl: (1) HERO Classifications and General Requirements
(2) Ordnance
(3) Station Drawings
(4) HERO EMCON Ordnance Matrix
(5) HERO EMCON Condition Matrix
(6) Antenna and Transmitter Systems
(7) HERO Warning Label and Warning Symbol
(8) Station Call List for HERO EMCON

1. Situation. This order publishes policy and procedures for the safe handling, storage, transportation and use of ordnance that is susceptible to electromagnetic radiation aboard Marine Corps Installations National Capital Region-Marine Corps Base Quantico (MCINCR-MCBQ).

2. Cancellation. MCINCR-MCBQ 8020.1B.

3. Mission. To disseminate policies and procedures for the safe handling, storage, field storage, transportation and disposal of ammunition and explosives in an environment susceptible to the hazards of electromagnetic radiation to ordnance (HERO) and to

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

outline procedures to set emission controls (EMCON) when required aboard MCINCR-MCBQ.

4. Execution

a. Commander's Intent and Concept of Operations

(1) Commander's Intent. It is the intent of this order to provide policy guidance on safe HERO procedures when HERO SUSCEPTIBLE or HERO UNSAFE ORDNANCE is handled, loaded or transported by personnel aboard Marine Corps Installations National Capital Region-Marine Corps Base Quantico at all ordnance locations. Enclosure (2) is a list of HERO SAFE, HERO SUSCEPTIBLE and HERO UNSAFE ORDNANCE commonly used aboard MCINCR-MCBQ.

(2) Concept of Operations. Oversight of the HERO Program will be a joint operation with responsibilities shared between the MCINCR-MCBQ Safety Division and G-6. For HERO issues that exceed the local knowledge or expertise of the HERO Committee, the Naval Surface Warfare Center, Dahlgren Division (NSWCDD) (Code J52) will be contacted.

b. Subordinate Element Missions

(1) Director of Operations, G-3, Marine Corps Base Quantico

(a) Activate the Marine Corps Base Quantico Emergency Operations Center as required, to support response to a HERO SUSCEPTIBLE or HERO UNSAFE incident aboard the installation.

(b) Identify Range Management and Explosive Ordnance Disposal (EOD) HERO points of contact.

(2) Head, Range Management Branch

(a) Ensure units and personnel using MCINCR-MCBQ RTAs and the special use airspace (R6608A, R6608B, and R6608C) west of Interstate 95 are aware of HERO and understand their responsibilities and procedures to prevent and respond to a HERO incident.

(b) Provide a representative to attend HERO Committee meetings.

(c) During certification training, educate range

officers in charge and range safety officers on safety precautions and procedures when using ordnance susceptible to electromagnetic radiation.

(d) Incorporate HERO guidance and instruction into applicable SOPs for RTAs and airspace; update HERO information in the SOPs, as required.

(e) Provide support to emergency personnel first responding to a HERO incident that occurs in the Marine Corps Installations National Capital Region-Marine Corps Base Quantico RTA complex west of Interstate 95.

(f) Through the Range Management Branch Fire Desk, maintain required communications with all military aircraft operating within the special use airspace and brief pilots on necessary HERO precautions or threats. Civilian aircraft allowed flight through the special use airspace shall maintain a minimum altitude of 2,500 feet above ground level (outside of HERO sensitivity). In the event communications with an aircraft (military or civilian) fail, the fire desk will notify training units or first responders of the uncontrolled flight and potential HERO threat; training units will then take appropriate action on the ground to safeguard personnel under their control.

(g) Take immediate action to halt training when the potential for a HERO incident is perceived.

(3) Explosives Ordnance Disposal Officer

(a) Provide a representative to attend HERO Committee meetings.

(b) Provide technical support to the ammunition Supply point (ASP), training units and emergency personnel first responding to a HERO incident that occurs aboard MCINCR-MCBQ, as required.

(c) Safely transport or render safe HERO SUSCEPTIBLE and HERO UNSAFE ORDNANCE that cannot be made safe.

(4) Director, Safety Division

(a) Appoint Explosives Safety Officer to serve on the HERO Committee.

(b) Be responsible for annual inspections of the MCINCR-MCBQ HERO Program to ensure it meets all requirements of reference (a) and this order.

(c) Convene annual meetings of ordnance and radiation hazard (RADHAZ) personnel to discuss and recommend changes to the instructions.

(d) Monitor the supply of HERO warning signs and stickers and order as necessary (see enclosure (7) for examples).

(e) Review RADHAZ requirements and request HERO surveys when required. MCINCR-MCBQ is currently on a 7-year cycle per reference (a).

(f) Maintain and update all ordnance transportation routes aboard the base.

(g) Ensure safety investigations are conducted for any mishaps involving HERO sensitive ordnance, as appropriate.

(h) Place and maintain safety signs onboard the installation to identify the HERO issue to motorists.

(i) Coordinate with the Federal Bureau of Investigation and Drug Enforcement Agency safety personnel to educate them about HERO annually and as requirements change.

(5) Assistant Chief of Staff, G-6

(a) Appoint a representative to serve on the HERO committee.

(b) Provide frequency management specific expertise.

(c) Serve as the base point of contact for radio frequency coordination.

(d) Ensure all communications specialists are familiar with HERO restrictions from a radio frequencies (RF) perspective.

(e) Provide recommendations to the G-6 Operations Officer with regard to the approval/disapproval of any requests to operate amateur radio equipment aboard MCINCR-MCBQ. If

approval is recommended, ensure the HERO Committee is consulted prior to approving the request. Ensure the HERO Committee is notified of transmitter and antenna changes aboard the base so committee members may review and provide comments on the ordnance specific implications of these changes. All new or modified transmitter installations should be submitted for HERO review per reference (c).

(f) Ensure all RF emitters under the cognizance of this command are marked with the safe operating distance prior to issue.

(g) Affix HERO warning labels to all mobile and portable radios. Enclosure (7) provides additional information on HERO warning labels.

(h) Establish check-in procedures for owners of citizens band and other mobile radios and cellular telephones to familiarize operators with HERO.

(6) Assistant Chief of Staff, G-4

(a) Provide a representative to attend HERO Committee meetings.

(b) Ensure that all ASP personnel are familiar with HERO restrictions applicable to ammunition and explosives (A&E) operations.

(c) When issuing A&E, advise the user of ordnance HERO status during all aspects of its life cycle (e.g., assembly, handling, loading/downloading operations).

(d) Inform the HERO Committee upon receipt of ordnance items not listed in enclosure (2) that are categorized as HERO SUSCEPTIBLE or HERO UNSAFE ORDNANCE so that they may be included in this order and HERO issues can be mitigated.

(e) Ensure catalogued A&E items have gone through a Weapon System Explosives Safety Review Board (WSESRB) and identify packaging requirements based on drawing numbers per the Ammunition Component Handbook therefore require no additional packaging considerations. A&E items that are not catalogued, (i.e. Non-DoD, commercial items) will be considered HERO UNSAFE at all times.

(f) Set the appropriate HERO condition during the handling of HERO SUSCEPTIBLE and HERO UNSAFE munitions within the ASP.

(g) Place HERO warning signs prohibiting radio transmissions at the entrance to the magazine area and all ordnance handling or storage activities.

(7) Commanding Officer, Marine Corps Air Facility.

(a) Provide a representative to attend HERO Committee meetings.

(8) Operations Officer, Marine Corps Air Facility.

(a) Act as the point of contact for the setting and monitoring of HERO EMCON throughout the air facility, as outlined in reference (b). The Operations Officer will maintain a list of names and telephone numbers for those activities impacted by HERO EMCON. All future emitter changes at air facility should be provided via the Air Traffic Control Maintenance Officer to the AC/S G-6 Frequency Manager and the Explosives Safety Officer for inclusion into this order.

(b) Restrict aircraft on the flight line from indiscriminately energizing any RF transmitters (communications, radars or electronic warfare equipment) while HERO conditions are in effect.

(c) Ensure that taxiing/landing aircraft are informed when HERO conditions are set.

(d) Establish and maintain liaison with Marine Helicopter Squadron-One (HMX-1), MCBQ Frequency Manager and the Explosives Safety Officer to resolve any conflicts in HERO requirements;

(e) Include HERO EMCON radio operating training as a qualification requirement for vehicle operators on the airfield and aboard the air facility.

(f) Inform the MCBQ Frequency Manager and Explosives Safety Officer upon receipt of ordnance items not listed in enclosure (2) that are categorized as HERO SUSCEPTIBLE or HERO UNSAFE ORDNANCE to be included in this order.

(10) Commanding Officers/Officers in Charge and Department Heads/Special Staff Assistants.

(a) Ensure all operators of communications equipment and aircrews comply with this order.

(b) Ensure personnel operating transmitters are properly instructed in their use during EMCON conditions.

(c) Notify the Frequency Manager, G-6, MCINCR-MCBQ prior to using new electronic equipment (that radiates) at MCB/MCAF Quantico.

(11) Tenant Activities

(a) Notify the AC/S G-6 MCINCR-MCBQ when new communications (or radar) equipment acquisitions are planned.

(b) Notify the HERO Committee in advance of the loading, downloading or transportation of said equipment so that HERO concerns can be properly addressed.

5. Administration and Logistics

a. Recommendations concerning the contents of this Order are invited. Such recommendations will be forwarded to the Commander (B 51 Attn: ESO), MCINCR-MCBQ, Quantico, via the appropriate chain of command.

b. Electronic copies of this order can be accessed online via MCINCR-MCBQ homepage at
<http://www.quantico.usmc.mil/directives.aspx?Command=MCBQ>

c. Updates, new emitter system specifications issuances and HERO safe separation distances are located at
<https://www.quantico.marines.mil/Offices-Staff/Safety-Division/Explosives-Safety-Office/>

6. Command and Signal

a. Command. This Order is effective the date signed.

b. Signal. This Order is applicable to all activities that handle, store, transport or conduct the emergency destruction of ammunition and explosives aboard Marine Corps

MCINCR-MCBQO 3565

Base, Quantico and to all activities utilizing the Ammunition Supply Point (ASP).

W. C. BENTLEY III

DISTRIBUTION: A

HERO CLASSIFICATIONS AND GENERAL REQUIREMENTS

Enclosure (1)

HERO CLASSIFICATIONS AND GENERAL REQUIREMENTS

1. As described in reference (b), electromagnetic radiation hazards stem from the functional characteristics of electrically initiated ordnance, and are a result of absorption of electromagnetic energy by the firing circuitry of electrically initiated devices (EIDs). The induced energy can cause heating of the bridgewire and primary explosive, and can result in premature, unintended actuation of the EID. Such an event can pose either a safety or reliability problem. In general, ordnance is most susceptible to radio-frequency (RF) electromagnetic environments (EMEs) during assembly, disassembly, handling, loading, and unloading. There are three classifications pertinent to HERO: HERO SAFE ORDNANCE, HERO SUSCEPTIBLE ORDNANCE, and HERO UNSAFE ORDNANCE. Therefore, HERO Emission Control (EMCON) and ordnance handling restrictions and procedures [see reference (a)] form a compromise which allows for the safe handling of ordnance within the existing EME. HERO EMCON is derived from an analysis of the EMEs produced by the existing antenna/transmitter systems and the ordnance susceptibilities described in reference (b), or through a HERO survey. The following paragraphs describe the categories of ordnance.

a. HERO SAFE ORDNANCE: Items that require no EME restrictions beyond the general HERO requirements described in Chapter 7, paragraph 7-3 of reference (b).

b. HERO SUSCEPTIBLE ORDNANCE: Items that are susceptible and require moderate EME restrictions.

c. HERO UNSAFE ORDNANCE: Items that are extremely susceptible and require severe EME restrictions.

2. The following requirements apply to all ordnance operations involving the presence, handling and loading/unloading of ordnance unless otherwise specified in ref (b).

a. Ordnance evolutions must be planned so that there is a minimum of ordnance exposure to the EMEs.

b. Avoid touching any exposed firing contact, wiring or other exposed circuitry with any part of the body or with any metallic object.

c. Ensure all open electrical connectors on the ordnance are covered with non-shorting caps.

- d. Ordnance will not be assembled/disassembled in an EME.
 - e. Igniters, primers, detonators and other items containing EIDs will not be stowed in magazines that have flexible waveguides routed through them.
2. Transport and store HERO UNSAFE/UNRELIABLE ORDNANCE in sealed, all-metal containers.
 3. When transporting HERO SUSCEPTIBLE ORDNANCE, comply with the ordnance handling requirements listed in reference (a) and Chapter 7 of reference (b).
 4. Establish a HERO liaison at each tenant activity to document and monitor future emitter and ordnance operation changes within the activity. This POC should relate all such changes to station Base Frequency manager and Explosives Safety Officer.
 5. The Explosives Safety Officer, shall coordinate the HERO program and account for all station and tenant command information concerning ordnance inventory/operations. Additionally, the Frequency manager should be notified of any future transmitter and antenna changes at this facility and are submitted for HERO review in accordance with reference (c).
 6. Post and maintain HERO warning signs at all entrance gates to ordnance areas.
 7. Ensure ships berthed at the station silence all shipboard emitters whenever ordnance operations occur within the HERO separation distances listed in Appendix A of their respective report.
 8. Observe the HERO separation distances listed in enclosure (6) for cellular telephones and mobile and portable radios and affix HERO warning labels stating separation distances for HERO UNSAFE/UNRELIABLE and HERO SUSCEPTIBLE ORDNANCE to device.
 9. Maintain control over the number, type and placement of temporary emitter systems installed at the station. Ensure the calculated HERO safe separation distances are maintained between the antennas and ordnance operations. [See Chapter 2, paragraph 2-2.1 of reference (b).]
 10. Ensure that operators of privately owned amateur and citizens band radios and cellular telephones are familiar with

HERO and safe separation distance requirements for their particular radio or telephone.

11. Ensure that radio systems installed in ordnance handling vehicles maintain the minimum 10-foot antenna-to-ordnance separation distance required for HERO SAFE ORDNANCE. [See Chapter 7, paragraph 7-3.2 of reference (b).]

12. Ensure that operators, handlers and riggers transferring ordnance maintain a minimum safe separation distance of 19 feet from HERO UNSAFE/UNRELIABLE ORDNANCE when using single portable radios operating in the 136-174 MHz frequency range and at a maximum output power of 2 watts. For the use of other single portable radios, refer to enclosure (6) or Chapter 2, paragraph 2-2.1 of reference (b) for applicable safe separation distances.

13. Prior to conducting geophysical surveys for unexploded ordnance (UXO) using equipment with electromagnetic transmitting detection/location (ground-penetrating radar, ground conductivity meters, etc.) systems, contact NOSSA, N84, for HERO safety guidance.

14. Any changes to the station's antenna/transmitter system or ordnance configurations are subject to the requirements cited in reference (c). This applies even if an activity moves from one site to another within the confines of the facility.

15. For transmitters and ordnance not specifically addressed in this report, see reference (b) for HERO guidance.

16. Cellular telephones should not be operated within ordnance facilities unless approved by the Commanding Officer or OIC of the facility. Approved devices must remain in Airplane mode while inside an Ordnance Operating area.

17. Keyless entry systems should not be radiated within ordnance facilities. It is recommended that these systems not be allowed into ordnance facility work areas.

18. If HERO UNSAFE/UNRELIABLE or HERO SUSCEPTIBLE ORDNANCE is exposed on the flight line or in the hangars, silence or apply the HERO separation distances listed in enclosure (6) for transmitters on all aircraft. Exceptions are very high frequency (VHF) and ultra-high frequency (UHF) transmitters operating at less than 20 watts output power if HERO UNSAFE/UNRELIABLE ORDNANCE is exposed or transmitters operating

at less than 40 watts output power if HERO SUSCEPTIBLE ORDNANCE is exposed. All transmitters may operate into dummy loads.

19. In the event of an ordnance accident, ensure that response units maintain a minimum separation distance of 150 feet from the accident site when 3 or more VHF/UHF mobile radios are in use and 50 feet when 3 or more portable VHF radios are in use. For single VHF radio use, see the applicable separation distances listed in enclosure (6).

20. In the event of an ordnance accident or emergency involving aircraft carrying aviation ordnance (or an ordnance carrier along the ordnance transportation route), the appropriate HERO EMCON (defined in enclosures (4) and (5) will be set by the Range Control Officer, ASP OIC or MCAF Operations Officer, as appropriate. The EMCON will remain in effect until EOD personnel have rendered the ordnance safe or determined that EMCON is no longer required. In all instances, the Operations Officer, MCAF will contact all activities impacted by HERO (stationary transmitters to be silenced) and inform all aircraft on the ground (or inbound aircraft) to discontinue the use of HF communications and high power radars.

ORDNANCE

Enclosure (2)

ORDNANCE NOMENCLATURE

A	Bombs, Components, and Countermeasures
AAC	Antiaircraft, common
A/C, ACFT	Aircraft
AC	Aircraft, common
AD, ADF	Auxiliary detonating fuze
AGM	Air-surface attack missile
AIM	Air intercept-aerial missile
AN/ALE	Army/Navy - air-launched, expendable
ANTI-PERS, APERS	Antipersonnel
APDS	Armor piercing, discarding
APERS	Antipersonnel
API	Armor-Piercing Incendiary
APT	Armor-Piercing Tracer
ASSY, AY	Assembly
ATM	Air Training Missile
AUR	All-Up Round
AV	Attack fighter aircraft
B	Military Pyrotechnics
BBU	Explosive item unit
BCU	Battery Cooling Unit
BDU	Simulated bomb
BLP	Blind-loaded and plugged
BSU	Munitions stabilizing and retarding device unit
C	Military Chemicals
CAL	Caliber
CBU	Cluster Bomb Unit
CCG	Computer Control Group
CCU	Actuator cartridge
CH	Channel
CHG	Charge
Class	Classification
CNTR	Container
CNU	Shipping and storage container
C/O	Consist(s) of
CO.	Company
COMB	Combination
COMP	Composition
CP	Case-percussion
CS	Tear gas
CS-1	Tear gas (super)
CTG	Cartridge
CVT	Controlled variable time Fuze
D	Underwater sound signals, sonobuoys, and components

NOMENCLATURE (CONT.)

DBL	Double
DEA	Drug Enforcement Agency
DEMO	Demolition
DET	Detonator
DICASS	Direction command active sonobuoy system
DoDIC	Department of Defense Identification Code
DP	Dual-purpose
DWG	Drawing
E	Demolition explosives and materials
EA	Each
EOD	Explosive Ordnance Disposal
ERDL	Extended Range Data Link
F/	For
FCDC	Flexible, confined detonating cord
FL	Flashless
FLU	Flotation unit
FMLY	Formerly
FMU	Fuze Munition Unit
FRAG	Fragmentation
FREQ	Frequency
FT	Feet
FWD	Forward
FZ	Fuze
G	Underwater Mines and Components
GA	Gauge
GAU	Gun Aircraft Unit
GN, GR	Grain
GP	General-purpose
GRAN	Granular
GW	Guided Weapon
H	Cartridges and Cartridge-Actuated Devices
HARM	High-Speed Anti-Radiation Missile
HC	High Capacity
HE	High Explosive
HEDP	High Explosive Detonating Point
HEI	High Explosive, Incendiary
HERO	Hazards of Electromagnetic Radiation to Ordnance
HOW	Howitzer
HR	Hour
I, INC	Incendiary
IGN, INGR	Ignition, Igniter
ILLUM	Illuminating
IN	Inch

NOMENCLATURE (CONT.)

IR	Infrared
J	Aircraft rockets and components
JAU	Initiator, cartridge-actuated
L	Marine Corps ammunition
LAU	Aircraft-installed launcher
LB	Pound
LDD	Loaded
LSN	Local Stock Number
M	TOMAHAWK Cruise Missile and Components
MAU	Miscellaneous Armament Unit
MBEU	Multiple Bomb Ejection Unit
MDP	Miniature Double Plug
MECH	Mechanical
MG	Machine Gun
MIN	Minute
MK	Mark
MM	Millimeter
MOD	Model/Modification
MSL	Missile
MTL, METI	Metal
MTR	Motor
MXU	Miscellaneous units
NATO	North Atlantic Treaty Organization
NAVAIR	Naval Air Systems Command
NAVSEA	Naval Sea Systems Command
NO	Number
NON-ELECT	Non-electric
NON FRAG	Non-fragmentation
O	Miscellaneous Ammunition Components and Containers
OA	Operational Assembly
OP	Ordnance Publication
OZ	Ounce
P	Small Arms and landing-force ammunition
PD, PDF	Point-detonating Fuze
PGU	Programmer unit
PIBD	Point-initiating, base detonating
P/N	Part Number
PRAC	Practice
PROJ	Projectile
PROP	Propellant
Q	Gun ammunition, 20 mm to 4-inch
R	Gun ammunition, over 4-inch
RBOC	Rapid Blooming Offboard Chaff

NOMENCLATURE (CONT.)

RD	Round
REF	Reference

HERO EMCON CONDITION MATRIX

Enclosure (5)

MCB/MCAF QUANTICO
HERO EMCON CONDITION MATRIX – DECEMBER 2016

HERO CONDITION	REQUIREMENTS	HERO ZONE
0	<p>HERO EMCON is not required; all transmitters [as listed in enclosure (6)] may be operated. Observe the general HERO requirements outlined in Chapter 7 of OP 3565.</p> <p>This condition applies to HERO UNSAFE ORDNANCE in HERO zone 1.</p> <ul style="list-style-type: none"> • Observe the HERO UNSAFE ORDNANCE safe separation distances for all aircraft transmitters except VHF/UHF communications transmitters operating at less than 20 watts or transmitters operating into dummy loads. 	
1	<ul style="list-style-type: none"> • For in-flight aircraft carrying ordnance items directly exposed to the installation's EME, observe the HERO UNSAFE ORDNANCE safe separation distances listed in enclosure (6) for all stationary transmitters. • Observe the HERO UNSAFE ORDNANCE safe separation distances listed in enclosure (6) for all mobile and portable transmitters. • For an ordnance accident, emergency response units such as the Fire Department, Weapons Department, and Security responding to the scene with radio equipment must maintain a minimum separation distance of 150 feet from the accident site if using 3 VHF (132-174 MHz) mobile radios; similarly, a minimum separation distance of 50 feet must be maintained when using 3 VHF portable radios. Silence all other radios at the scene; for single radio use, apply the safe separation distances cited in enclosure (6) for that specific mobile or portable unit. 	1
2	<p>This condition applies to HERO UNSAFE ORDNANCE in HERO zone 2.</p> <ul style="list-style-type: none"> • Observe the HERO UNSAFE ORDNANCE safe separation distances listed in enclosure (6) for all mobile and portable transmitters. • For an ordnance accident, emergency response units such as the Fire Department, Weapons Department, and Security responding to the scene with radio equipment must maintain a minimum separation distance of 150 feet from the accident site if using 3 VHF (132-174 MHz) mobile radios; similarly, a minimum separation distance of 50 feet must be maintained when using 3 VHF portable radios. Silence all other radios at the scene; for single radio use, apply the safe separation distances cited in enclosure (6) for that specific mobile or portable unit. 	2
3	<p>This condition applies to HERO UNSAFE ORDNANCE in HERO zone 3.</p> <ul style="list-style-type: none"> • Observe the HERO UNSAFE ORDNANCE safe separation distances listed in enclosure (6) for all mobile and portable transmitters. • For an ordnance accident, emergency response units such as the Fire Department, Weapons Department, and Security responding to the scene with radio equipment must maintain a minimum separation distance of 150 feet from the accident site if using 3 VHF (132-174 MHz) mobile radios; similarly, a minimum separation distance of 50 feet must be maintained when using 3 VHF portable radios. HERO WARNING LABEL AND WARNING SYMBOL

Enclosure (7)

HERO WARNING LABEL AND WARNING SYMBOL

The HERO warning label (white and olive drab versions shown below) shall be affixed to mobile and portable emitter systems such as radios and cellular phones. This warning label alerts the emitter operator to a potential hazard if the emitter is operated within the prescribed distance of ordnance operations.

HERO WARNING LABEL

The label has blank spaces for inserting HERO UNSAFE ORDNANCE and HERO SUSCEPTIBLE ORDNANCE safe separation distances. The distances are obtained from enclosure (6) of this instruction for individual mobile or portable emitter systems.

The recommended HERO warning symbol is shown below. This symbol is placed at entry points to ordnance operations areas (e.g., missile assembly, ammunition pier, etc.) to alert operators of mobile and portable emitter systems such as radios and cellular phones to a potential hazard when using radios and cellular phones past this point. Guidance for manufacturing symbols is provided below.

HERO WARNING SYMBOL

Materials: Anodized aluminum, adhesive backing optional.

Colors: Base material of anodized silver background; black anodized messages in bottom triangle: alternating colored blocks of anodized red and yellow in a border surrounding black anodized logogram in top triangle.

Logogram: Design will be a pictorial presentation of a radar antenna consisting of a pylon with a dot simulating an antenna and concentric area simulating pulsed energy.

Wording: The title, **WARNING: RADIO FREQUENCY HAZARD**, is standard for all symbols; the messages in the lower triangle will vary according to particular situation; use of descriptive wording or warning information is the user's option.
